

Title of the study:	Measure for Dyadic Conversation in Aphasia (MDCA): Psychometric testing
Principal Investigator:	Professor Katerina Hilari

Eligibility check – PWA and partner

Responder: PWA, partner, referrer (aphasia group co-ordinator)

PWA:

<p>1-4 should be yes to be eligible All 5 should be no to be eligible</p>

1. Age:

In years (18 or more)

2. Aphasia due to stroke:

Tick if present

3. Stroke (causing aphasia):

Time post stroke (3m or more)

4. FAST receptive

Score 7 or more

5. Any exclusions (if any present, exclude)

Speech and language disorder with cause other than stroke;

Still in an acute hospital;

Have uncorrected visual or hearing problems;

Have a cognitive difficulty that limits ability to respond reliably to questionnaires;

Have other severe or potentially terminal comorbidity

Nominate partner

Name

Partner:

1. Age:

In years (18 or more)

Relationship to person with aphasia
(specify):

2.Frequency of contact:
Times per week (3 or more)

5.Any exclusions (if any present,
exclude)

*Have uncorrected visual or hearing problems;
Have a cognitive difficulty that limits ability to
respond reliably to questionnaires;
Have other severe or potentially terminal
comorbidity*
