

PARTICIPANTS NEEDED FOR RESEARCH IN APHASIA

Conversations are hard when you have aphasia! We need better tools to capture problems in conversations to see what we can do about them.

We are looking for volunteers to take part in a study to test **a new measure on conversations for people with aphasia and their partners.**

As a participant in this study, we would ask you to:

- Complete **3-4 measures on conversations with your partner, communication, feelings and quality of life**
- Your participation would involve **three sessions**, each of which is approximately 30 – 60 minutes.
- We can see you **on-line or in-person**, whatever suits you best

For more information about this study, or to volunteer for this study,
please contact:
